addresses issues that have never before been raised in the study of Stalinism. Stalinism constitutes one of the most striking and contentious phenomena of the twentieth century. It not only transformed the Soviet Union into a major military-industrial power, but through both the Second World War and the ensuing Cold War, and its effect on the political Left throughout much of the world, it also transformed much of that world. This collection of papers by an international cast of authors investigates a variety of major aspects of Stalinism. Significant new questions - like the role of private enterprise and violence in state-making - as well as some of the more established questions - like the number of Soviet citizens who died in the Second World War, whether agricultural collectivisation was genocidal, nationality policy, the politics of executive power, and the Leningrad affair - are addressed here in innovative and stimulating ways. The chapters in this book were originally published as a special issue of Europe-Asia Studies.

Oppression and violence are often cited as the pivotal aspects of modern dictatorships, but it is the collusion of large majorities that enable these regimes to function. The desire for a better life and a powerful national, if not imperial community provide the basis for the many forms of people's cooperation explored in this volume.

The political revolutions which established state socialism in the Soviet Union and Eastern Europe were accompanied by revolutions in the word, as the communist project implied not only remaking the world but also renaming it. As new institutions, social roles, rituals and behaviours emerged, so did language practices that designated, articulated and performed these phenomena. This book examines the use of communist language in the Stalinist and post-Stalinist periods. It goes beyond characterising this linguistic variety as crude "newspeak", showing how official language was much more complex - the medium through which important political-ideological messages were elaborated, transmitted and also contested, revealing contradictions, discursive cleavages and performative variations.
