Hired candidates will start orientation/training on LVMC's medical-surgical ... Life Support (PALS), National Institute Stroke Scale (NIHSS), and Neonatal Resuscitation Program (NRP).

Lompoc Valley Medical Center Creates Nurse Grad Residency Program
However, an initial quick NIH stroke scale score of 7 was obtained by nursing staff. He was given 2 points for severe dysarthria, 3 points for aphasia, and 2 points for partial right facial paresis.

This volume provides a comprehensive exploration of stroke, from basic mechanisms of disease to enhanced diagnostic and therapeutic capabilities. The ongoing efforts within the neurological community are also highlighted, bringing a better understanding of the pathophysiological basis of this disorder. Clinicians will find invaluable information that can be used to enhance the lives of an aging global population. Covered topics include the functional anatomy of the brain itself, as well as advancements in the understanding of the biochemical background of strokes. Related fields and their dramatic impact on stroke research are also included, with findings in the fields of epidemiology, genetics, neuroimaging, and interventional radiology thoroughly explored. In addition, great attention is paid to therapeutic avenues, including investigation, prevention, and patient management. * A comprehensive resource for information on diagnostic advancements, prevention, and treatment of strokes * A clinical perspective on the ways related fields such as epidemiology, genetics, and neuroimaging, amongst others, are impacting new research in this disorder * A foundation that will enable researchers to pursue new clinical investigations

PCCN Certification Review is an exceptional resource that takes critical care nurses through the entire PCCN certification process, guiding them through the procedures for registering for the exam, offering test-taking strategies, and providing the various resources and paperwork they need to complete their certification.Includes a free CD-ROM of practice questions!

Written specifically for anyone preparing for the board for the very first time or those preparing to recertify, this comprehensive board review guide will aid in the preparation for the neurology board certification and re-certification exams. With extensive neuroimaging, illustrations, and neuropathology included, this book eliminates the need for obtaining multiple resources to study for the neurology board examination with high-yield information emphasized to highlight key facts. The book is divided into the basic sciences in Part 1 and clinical neurology in Part 2. It features short, easy-to-read chapters to help the busy resident, fellow, and clinician "on the run." In addition to those people preparing to take, or recertify for, the neurology boards, it will also be useful to medical students and residents rotating through neurology or for the generalist with an interest in reviewing neurology.

Adult CCRN Certification Review, Second Edition is the perfect study guide for nurses preparing to take the Adult CCRN exam administered by the American Association of Critical-Care Nurses (AACN). First introduced in 1976, CCRN certification reflects expertise for nurses providing care to acutely or critically ill adults and their families in areas such as intensive and cardiac care units, trauma units, or critical care transport. Completely updated and revised, Adult CCRN Certification Review, Second Edition contains more than 1,200 questions with comprehensive rationales on a broad range of topics divided into sections similar to those found on the Adult CCRN Test Plan. New to this edition are sections on behavioral/psychosocial issues and special populations in critical care. Included with each new print book is an online Access Code for Navigate TestPrep, a dynamic and fully hosted online assessment tool designed to help nurses prepare for certification examinations by offering the book s questions, detailed rationales, and reporting. * Randomized questions from the book create new exams on each attempt * Monitors results on practice examinations with score and time tracking * Reporting tools evaluate progress and results

Review Guides/Certification Prep/Pocket Guides
The perfect study guide for the emergency nursing certification exam (CEN), this new edition contains over 1,600 questions, answers, and rationales in an easy-to-use two-column format:questions in the left column correct answers and rationales in the right. The format closely follows the actual CEN exam blueprint. In addition to Q&A, the book also provides test-taking tips and strategies and an extensive appendix withcommonly encountered cardiac arrhythmias, ECGs, life-support drugs, and triage assessment principles. The Point offers 400 additional Q&A in both review and self-test modes.

This unique, concise ready reference for daily use collates for the first time the most useful, practical and simple assessment scales used in geriatric settings. It provides tools to identify clinical conditions and health outcomes objectively and reliably. It is essential as a clinical primer and everyday reference guide for all practising and training members of multidisciplinary teams, including consultants and doctors in specialist training, career grade doctors and general practitioners, and medical students; nurses, health visitors, dieticians, and social workers; allied health professionals such as physiotherapists, occupational therapists, speech and language therapists; and managers of elderly care services.Assessment is central to the practice of Geriatric Medicine. All members of the multidisciplinary team require a sound knowledge of the basic principles of measurement scales. We need to be competent in using and selecting appropriate scales, understanding which scales are valid and fit for purpose. Unfortunately, up to now, this has been a difficult task often requiring reference to original papers. Dr Gupta's scholarship has come to the rescue. He has trawled through the many hundreds of scales available selecting those most useful for the specialty.This book will be valuable to all members of the multidisciplinary team. Dr Gupta has done an excellent job outlining the theory and practice of measurement scales. He has put together an extremely useful compendium of scales. I congratulate him and wish his publication every success. I can foresee this publication becoming an essential text for every unit library and valuable book for individual clinicians. - Dr Jeremy Playfer in his Foreword. This book summarises the most commonly used validated assessment scales which can be used by medical students, postgraduate trainees, consultants and the multi-disciplinary team members. I hope a copy of this book will be kept on every ward, outpatient department and GP practice for daily use and reference. - Professor Bim Bhowmick OBE in his Foreword.

This updated and expanded new edition takes neurology trainees by the hand and guides them through the whole patient encounter - from an efficient neurological history and bedside examination through to differential diagnosis, diagnostic procedures and treatment. At each step the expert authors point out what is essential and what is not. Since the first edition, which was Highly Commended at the BMA Book Awards, chapters have been thoroughly revised and reflect the essential state-of-the-art knowledge neurologists need to acquire during their training. New graphic material has been added, as have new chapters including neurogenetics, neurorehabilitation, neurocritical care and heuristic neurological reasoning. In addition, this second edition now includes more than 100 unique case histories. Neurology at the Bedside, Second Edition is written for neurologists in all stages of training. Medical students, general practitioners and others with an interest in neurology will also find invaluable information here.

This issue of Medical Clinics, guest edited by Dr. Joseph F. Szot, is devoted to Outpatient Emergencies.
