Written for the full year or three term Calculus-based University Physics course for science and engineering majors, the publication of the first edition of Physics in 1960 launched the modern era of Physics textbooks. It was a new paradigm at the time and continues to be the dominant model for all texts. Physics is the most realistic option for schools looking to teach a more demanding course. The entirety of Volume 2 of the 5th edition has been edited to clarify conceptual development in light of recent findings of physics education research. End-of-chapter problem sets are thoroughly over-hauled, new problems are added, outdated references are deleted, and new short-answer conceptual questions are added.

The Vietnam Veterans Memorial in Washington, D.C., is one of the most famous pieces of civic architecture in the world. But most people are not as familiar with the reserved college student who entered and won the design competition to build it. This accessible biography tells the story of Maya Lin, from her struggle to stick with her vision of the memorial to the wide variety of works she has created since then. The carefully researched text, paired with ample photos, crosses multiple interests—American history, civic activism, art history, and cultural diversity—and offers a timely celebration of the memorial's 35th anniversary as well as providing an important contribution to the current discussion of the role of women and minorities in society.

This New York Times bestseller by the author of the environmental classic Silent Spring beautifully details the coastal ecosystem of birds and the sea. In her first book, preeminent nature writer Rachel Carson tells the story of the sea creatures and birds that dwell in and around the waters along North America 's eastern coast—and the delicately balanced ecosystem that sustains them. Following the life cycles of a pair of sanderlings, a mackerel, and an eel, Carson gracefully weaves scientific observation with imaginative prose to educate and inspire, creating one of the finest wildlife narratives in American literature. This ebook features an illustrated biography of Rachel Carson including rare photos and never-before-seen documents from the Beinecke Rare Book and Manuscript Library at Yale University.
