Classic novel portraying a humane and joyous sustainable state in America.

Ecotopia was founded when northern California, Oregon, and Washington seceded from the Union to create a "stable-state" ecosystem: the perfect balance between human beings and the environment. Now, twenty years later, the isolated, mysterious Ecotopia

welcomes its first officially sanctioned American visitor: New York Times-Post reporter Will Weston. Like a modern Gulliver, the skeptical Weston is by turns impressed, horrified, and overwhelmed by Ecotopia's strange practices: employee ownership of farms and businesses, the twenty-hour work week, the fanatical elimination of pollution, mini-cities that defeat overcrowding, devotion to trees bordering on worship, a woman-dominated government, and bloody, ritual war games. Bombarded by innovative, unsettling ideas, set afire by a relationship with a sexually forthright Ecotopian woman, Weston's conflict of values intensifies—and leads to a startling climax.

A novel both timely and prophetic, Ernest Callenbach's *Ecotopia* is a hopeful antidote to the environmental concerns of today, set in an ecologically sound future society. Hailed by the Los Angeles Times as the "newest name after Wells, Verne, Huxley, and Orwell," Callenbach offers a visionary blueprint for the survival of our planet . . . and our future. Ecotopia was founded when northern California, Oregon, and Washington seceded from the Union to create a "stable-state" ecosystem: the perfect balance between human beings and the environment. about this green new world, Weston is determined to report his findings objectively. But from the start, he's alternately impressed and unsettled by the laws governing Ecotopia's earth-friendly agenda: energy-efficient "mini-cities" to eliminate urban sprawl, zero-tolerance pollution control, tree worship, ritual war games, and a woman-dominated government that has instituted such peaceful revolutions as the twenty-hour workweek and employee ownership of farms and businesses. His old beliefs challenged, his cynicism replaced by hope, Weston meets a sexually forthright Ecotopian woman and undertakes a relationship whose intensity will lead him to a critical choice between two worlds.

Presents thirty novel terms that do not yet exist in English to envision ways of responding to the environmental challenges of our generation. As the scale and gravity of climate change becomes undeniable, a cultural revolution must ultimately match progress in the realms of policy, infrastructure, and technology. Proceeding from the notion that dominant Western cultures lack the terms and concepts to describe or respond to our environmental crisis, *An Ecotopian Lexicon* is a collaborative volume of short, engaging essays that offer ecologically productive terms—drawn from other languages, science

fiction, and subcultures of resistance—to envision and inspire responses and alternatives to fossil-fueled neoliberal capitalism. Each of the thirty suggested “loanwords” helps us imagine how to adapt and even flourish in the face of the socioecological adversity that characterizes the present moment and the future that awaits. From “Apocalypso” to “Qi,” “ ~*~ ” to “Total Liberation,” thirty authors from a range of disciplines and backgrounds assemble a grounded yet dizzying lexicon, expanding the limited European and North American conceptual lexicon that many activists, educators, scholars, students, and citizens have inherited. Fourteen artists from eleven countries respond to these chapters with original artwork that illustrates the contours of the possible better worlds and worldviews. Seattle, often called the “Emerald City,” did not achieve its green, clean, and sustainable environment easily. This thriving ecotopia is the byproduct of continuing efforts by residents, businesses, and civic leaders alike. In *Seattle and the Roots of Urban Sustainability*, Jeffrey Craig Sanders examines the rise of environmental activism in Seattle amidst the “urban crisis” of the 1960s and its aftermath. Like much activism during this period, the environmental movement began at the grassroots level—in local neighborhoods over local issues. Sanders links the rise of local

environmentalism to larger movements for economic, racial, and gender equality and to a counterculture that changed the social and political landscape. He examines emblematic battles that erupted over the planned demolition of Pike Place Market, a local landmark, and environmental organizing in the Central District during the War on Poverty. Sanders also relates the story of Fort Lawton, a decommissioned army base, where Audubon Society members and Native American activists feuded over future land use. The rise and popularity of environmental consciousness among Seattle's residents came to influence everything from industry to politics, planning, and global environmental movements. Yet, as Sanders reveals, it was in the small, local struggles that urban environmental activism began.

Seen from 1974, the story is set 25 years in the future in the year of 1999. Ecotopian citizens are described as creative, free-thinking, liberal and energetic people, who place value on work in team configurations and social responsibility. William Weston provides the reader with detailed insights into the Ecotopian lifestyle, politics, sexual freedom, education, and gender relations. However, the main focus of the book is on ecological aspects. This essay is concerned with the ecological concerns and their collective realization in Ecotopia, whereas emphasis will be put on Ecotopias food circle, food production and processing, car-less living, television and wares, Ecotopian economy, their woods, plastics, and their way of generating energy from sun and sea."

Fiction. This prequel to ECOTOPIA is a multi-stranded novel that dramatizes the rise and triumph of a powerful American movement to preserve the earth as a safe, habitable environment. Its heroine is a brash and brilliant high school student who invents a better photovoltaic cell. People who also appear in ECOTOPIA first join the story in this epic vision of the birth of a new nation.
