An exploration of the New Deal era highlights the politicians and pundits of the time, many of whom advocated for questionable positions, including separation of the races and an American dictatorship.

The Crisis, founded by W.E.B. Du Bois

as the official publication of the NAACP, is a journal of civil rights, history, politics, and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, The Crisis has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and, in many instances, set the economic, political and social agenda for our nation and its multi-ethnic citizens.

Dietrich Bonhoeffer writes in one of his last prison letters that he had come to know and understand more and more the profound this-worldliness of Christianity. In Taking Hold of the

Real, Barry Harvey engages in constructive conversation with Bonhoeffer, contending that the shallow and banal this-worldliness of modern society is ordered to a significant degree around the social technologies of religion, culture, and race. These mechanisms displace human beings from their traditional connections with particular locales, and relocate them in their proper places as determined by the nation-state and capitalist markets. Christians are called to participate in the profound this-worldliness that breaks into the world in the apocalyptic action of Jesus Christ, a form of life that requires discipline and an understanding of death and resurrection. The church is a sacrament of this new humanity, performing for all to hear the

polyphony of life that was prefigured in the Old Testament and now is realised in Christ. Unable to find a faithful form of this-worldliness in wartime Germany, Bonhoeffer joined the conspiracy against Hitler, a decision aptly contrasted with a small French church that, prepared by its life together over many generations, saved thousands of Jewish lives.

When Franklin D. Roosevelt became president in March 1933, he initially devoted most of his attention to finding a solution to the Great Depression. But the pull of war and the results of FDR's foreign policy ultimately had a deeper and more transformative impact on U.S. history. *The Triumph of Internationalism* offers a fresh, concise analysis and narrative of FDR's foreign policy from 1933 to America's entry

into World War II in 1941. David Schmitz covers the attempts to solve the international economic crisis of the Great Depression, the Good Neighbor Policy in Latin America, the U.S. response to war in Europe and the Pacific, and other topics of this turbulent era. Schmitz describes Roosevelt as an internationalist who set out to promote U.S. interests abroad short of direct intervention. He tried to make amends for past transgressions with the nation's southern neighbors, eventually attempted to open and promote international trade to foster economic growth, and pursued containment policies intended to halt both the Japanese threat in the Pacific through deterrence and German aggression in Europe through economic appeasement. When his policies

regarding the Axis powers failed, he began educating the American public about the dangers of Axis hegemony and rearming the nation for war. This effort required a profound shift in the American mind-set, given the prevailing isolationism, the disillusionment with America's involvement in World War I, and the preoccupation with domestic problems. A less powerful president would likely have failed, or perhaps not even attempted, to alter the prevailing public opinion. FDR revived American internationalism and reshaped the public's understanding of the national interest and defense. Roosevelt's policies and the outcome of World War II made the United States a superpower without equal.

Faced by the disaster of depression, Congress in the early 1930s proved amenable to the far-reaching demands and programs presented to it by the newly elected President, Franklin D. Roosevelt, but by 1937 it showed increasing resistance, even outright opposition, to many New Deal measures. In this study, James T. Patterson examines this resurgence of conservative strength in Congress, focusing upon the personalities and backgrounds of the men involved and upon the key domestic issues which brought them together in an informal coalition opposed to executive plans, especially for the years 1937--1939. From the first the Roosevelt Congress had had its "irreconcilables" -- men like Carter Glass, Millard Tydings, and Harry Byrd -- who viewed the New Deal with dismay, and in the voting on

the public utilities holding company bill and the surprise tax measure of 1935 they were joined by a significant number of other congressmen who had hitherto supported the administration. It was, however, Roosevelt's plan to enlarge the Supreme Court that proved to be the turning point. This controversial measure provided a common issue on which conservatives, both Republican and Democratic, could unite -- the "irreconcilables," Republicans like Arthur Vandenberg, others like Charles McNary, and nominal Democratic progressives like Burton K. Wheeler. Following this crucial confrontation, the bipartisan conservative coalition was able to control enough votes to oppose the administration on such key measures as the fair labor standards and

housing bills of 1937, the reorganization and tax bills of 1938, and the relief and tax bills of 1939. Incited by grievances over patronage, a feeling that the emergency was past, and fears of radicalism, congressmen increasingly asserted their independence of executive leadership. In this 1966 Organization of American Historians award-winning book, Patterson has provided a new exploration of one of the most significant developments in recent American history-the creation by conservative congressmen of a pattern of cooperation that continues to exert a potent influence upon the course of legislation.
