Former NRL star, Jarryd Hayne, will face a new trial over the alleged rape of a woman in 2018.

Volume 9 of the EYIEL focusses on natural resources law understood as a special area of international economic law. In light of increasing conflicts over access to and the use of natural resources and of their impact on political, social and environmental aspects, the contributions of this volume analyse to which extent international economic law can contribute to the sustainable exploitation, management and distribution of natural resources. The volume collects contributions on general principles of natural resources law, the importance of natural resources for trade, investment and European economic law as well as analyses of particular sectors and areas including fracking, timber, space and deep seabed mining and natural resources in the arctic region. In its section on regional developments, EYIEL 9 addresses two regional integration systems which are usually not at the centre of public interest, but which deserve all the more attention due to their special relations with Europe: The Eurasian Economic Union and the Caribbean Community (CARICOM). Further EYIEL sections address recent WTO and investment case law as well as developments at the IMF. The volume also contains review essays of important recent books in international economic law and other aspects of international law which are connected to international economic relations. The chapter "Sovereignty, Ownership and Consent in Natural Resource

Contracts: From Concepts to Practice" by Lorenzo Cotula is open access under a CC BY 4.0 license via link.springer.com.

The record-breaking records annual is back and packed with more incredible accomplishments, stunts, cutting-edge science and amazing sporting achievements than ever before. With more than 3,000 new and updated records and 1,000 eye-popping photos, it has thousands of new stats and facts and dazzling new features. There is so much to explore inside. Go on a whirlwind tour of the planet's most amazing places, from the largest swamps to the deepest points on Earth. Find out what happens when you give an octopus a Rubik's Cube, and why all you need to defend yourself from a crocodile is a rubber band! You'll also find all your favorite records and categories such as Big Stuff, Collections, Mass Participation and Fun with Food, plus the year's most significant sporting achievements. Our editors have also taken inspiration this year from the world of superheroes – both fictional and real-world – so look out for our feature chapter charting your favorite caped crusaders in comic books, TV shows and movies. We also meet the real-life record-breakers with genuine superpowers, such as the Canadian strongman vicar who can pull a jumbo jet and an actual cyborg who uses technology to augment his senses. You'll also learn all about the science of superheroes, such as who the fastest and strongest superheroes would be if they came to life, and who would win in a royal rumble between Superman, Batman, Hulk and Dr Strange! Also new this year is a celebration of the superlative with infographic poster pages that explore the most exciting absolutes, such as the longest, tallest, fastest and heaviest. Does the longest sofa outstretch the longest train? Is the tallest Easter egg bigger than the tallest snowman? Find out in this amazing new edition. You'll also find these special pages available as free poster downloads at guinnessworldrecords.com! From science to showbiz via stunts and sports, there are real-life heroes all around us in all shapes and sizes, achieving the extraordinary every day. There's only one book where you'll find so many amazing facts all in one place, and that's Guinness World Records 2018!

This book is the memoir of Kieran James, and details his experiences as co-founder of West Perth Football Club's unofficial cheer squad from 1984 to 1986. The book details "traditional," "hot" support for West Perth Football Club among teenaged supporters from middle-class and working-class backgrounds. The book shows how, because of neo-liberal ideologies and the corporatization of football, the new national league (the "expanded VFL" / AFL) relegated the WAFL to a second-tier league in 1987. This move took place over the heads of ordinary football supporters and two WAFL club presidents. Moves to bring the game closer to the people in 1984, such as holding the best-and-fairest award count night at Perth Entertainment Centre, should be seen in this light. This book will allow supporters to relive great teams, great players, and great matches from a wonderful era in WA football 1984-86 before West Coast Eagles joined the expanded VFL.

These proceedings represent the work of researchers participating in the 13th International Conference on Cyber Warfare and Security (ICCWS 2018) which is being hosted this year by the National Defense University in Washington DC, USA on 8-9 March 2018.

Journalism, Gender and Power revisits the key themes explored in the 1998 edited collection News, Gender and Power. It takes stock of progress made to date, and also breaks ground in advancing critical understandings of how and why gender matters for journalism and current democratic cultures. This new volume develops research insights into issues such as the influence of media ownership and control on sexism, women's employment, and "macho" news cultures, the gendering of objectivity and impartiality, tensions around the professional identities of journalists, news coverage of violence against women, the sexualization of women in the news, the everyday experience of normative hierarchies and biases in newswork, and the gendering of news audience expectations, amongst other issues. These issues prompt vital questions for feminist and gender-centred explorations concerned with reimagining

journalism in the public interest. Contributors to this volume challenge familiar perspectives, and in so doing, extend current parameters of dialogue and debate in fresh directions relevant to the increasingly digitalized, interactive intersections of journalism with gender and power around the globe. *Journalism, Gender and Power* will inspire readers to rethink conventional assumptions around gender in news reporting—conceptual, professional, and strategic—with an eye to forging alternative, progressive ways forward.

This book presents journeys of sixteen Indigenous Australian athletes from their first touch of a “footy” to the highest levels of Australian football and rugby league, conceptualized as a process of learning. The authors challenge simplistic explanations of Indigenous success in Australian football and rugby league, centered on the notion of the “natural athlete”. The book traces the development of Indigenous sporting expertise as a lifelong process of learning situated in local culture and shaped by the challenges of transitioning into professional sport. Individually, the life stories told by the participants provide fascinating insights into experience, culture and learning. Collectively, they provide deep understanding of the powerful influence that Aboriginal culture exerted on the participants’ journeys to the top of their sports while locating individual experience and agency within larger economic, cultural and social considerations. *Stories of Indigenous Success in Australian Sport* will be of interest to students and scholars across a range of disciplines including Indigenous studies, physical education, education, sport management and sociology

This book presents recent and important developments in the field of Photonics and Optoelectronics, with a particular focus on Laser Technology, Optical Communications, Optoelectronic Devices and Image Processing. At present, Photonics and Optoelectronics Technologies are pivotal to the future of laser, displays, sensors and communication technologies, and currently being developed at an extraordinary rate. This book details the theories underlying the mechanisms involved in the relevant Photonics and Optoelectronics. Devices such as laser diodes, photodetectors, and integrated optoelectronic circuits are investigated. The reviews by leading experts are of interest to researchers and engineers as well as advanced students.

In 1950s Los Angeles, entrepreneur Mike Dimitro convinced a group of young American athletes to fly around the world playing rugby league, a game that was entirely new to them. Miraculously, the American All Stars competed with the best Australia, New Zealand, and France had to offer, and shocked the locals with some stunning victories. This story tells not only of the media circus and celebrity adventures, but also the All Stars' fights and flings, tragic illnesses, and farcical court cases. Dimitro's mission to establish a rugby league in the United States failed in spectacular fashion—though one All Star went on to win the Super Bowl, one became a Hollywood stuntman, and another an Olympic champion.

The Comprehensive Guide to Computer Security, Extensively Revised with Newer Technologies, Methods, Ideas, and Examples In this updated guide, University of California at Davis Computer Security Laboratory co-director Matt Bishop offers clear, rigorous, and thorough coverage of modern computer security. Reflecting dramatic growth in the quantity, complexity, and consequences of security incidents, *Computer Security, Second Edition*, links core principles with technologies, methodologies, and ideas that have emerged since the first edition's publication. Writing for advanced undergraduates, graduate students, and IT professionals, Bishop covers foundational issues, policies, cryptography, systems design, assurance, and much more. He thoroughly addresses malware, vulnerability analysis, auditing, intrusion detection, and best-practice responses to attacks. In addition to new examples throughout, Bishop presents entirely new chapters on availability policy models and attack analysis. Understand computer security goals, problems, and challenges, and the deep links between theory and practice Learn how computer scientists seek to prove whether systems are secure Define security

policies for confidentiality, integrity, availability, and more Analyze policies to reflect core questions of trust, and use them to constrain operations and change Implement cryptography as one component of a wider computer and network security strategy Use system-oriented techniques to establish effective security mechanisms, defining who can act and what they can do Set appropriate security goals for a system or product, and ascertain how well it meets them Recognize program flaws and malicious logic, and detect attackers seeking to exploit them This is both a comprehensive text, explaining the most fundamental and pervasive aspects of the field, and a detailed reference. It will help you align security concepts with realistic policies, successfully implement your policies, and thoughtfully manage the trade-offs that inevitably arise. Register your book for convenient access to downloads, updates, and/or corrections as they become available. See inside book for details.

The autobiography of the league legend. Johnathan Thurston is widely regarded as rugby league's greatest player. This autobiography will follow Thurston's journey from a Brisbane kid who was written off as too skinny, too slow and too wild to play professionally, to his debut with the Canterbury Bulldogs in 2003, to State of Origin star, to Dally M and Clive Churchill Medal winner, and the fairytale premierships.
